

Hi! My name is Aubrey. I'm 8 years old and I am in 3rd grade.

I would like to tell you about something that I think would be cool in Sheboygan.

I would like to do this because it would be fun for children to play on.

My idea is a Bike Park!

I want a place for kids to learn how to ride their bikes.

Last summer, I did the Bike Rodeo and learned how to ride without training wheels.

At the Bike Rodeo, the policemen help you learn bike safety through obstacle courses.

This summer, I was able to do the Bike Rodeo lots of times on two wheels!

Here are some things that I would put in the Bike Park:

- A pipe or tunnel to ride through
- An area for parents to help their children ride
- Fire hydrants or cones to ride around
- A fake car and sidewalk to practice crossing the street
- A curvy section to practice your turns
- One path for younger kids learning how to ride and one path for kids who already know how
- A section of bumpy ground to ride over

The Police Department Bike Rodeo is set up and taken down twice a summer. I would like to have a permanent Bike Rodeo to play on all year long.

We have already talked to the City and County to help with planning and finding a location. The Police Department is already helping me with the design.

If you vote for my project, I promise to do a very good job and make sure your kids will love it!
